

BRIEF ON SOCIETY'S ACTIVITIES

Local engineers founded the Society in 1946 'To enable engineers and those closely associated with the trade and profession of engineering to meet and interchange ideas in their respective subjects connected with the various branches of the engineering profession, and to promote the science and practice of engineering generally amongst its members'.

Current membership is 130 including ladies. The Society has senior citizens enrolled on Honorary membership following a five years subscribed membership. This encourages a continuation of interest and friendship into retirement.

Lectures take place at Burton Technical College Friday evenings 7-30 to 9-30 p.m. Handouts on subjects are often available and full use is made of audio and visual aids in the excellent lecture theatre. Joint meetings are held annually with the Institute of Mechanical Engineers. Attendance is also made to the prestigious 'Faraday' presentation. A programme is arranged for visits to local firms and venturing further afield trips have been made to industrial museums, railways, airfields, mines and to the viewing of differing manufacturing processes.

A Ladies' Night is held during each session; our Annual Dinner and Dance has achieved a very high reputation. With lectures, social events and visits taking place we have a very active Society. The only qualification needed to join is simply a genuine interest.

The Society is indebted to many local firms for their financial patronage enabling us to maintain subscriptions at a reasonable level, it also assists with the lecturer's expenses and general running costs, though social events and visits are always self-financing.
